Erin Johnson

❖ **Value/Belief Statement**
  ➢ Holistically, I value the people I come to familiarize myself with. Between my family, friends, and even my co-workers, they shape parts of me as an individual. Beyond partners, they are teachers; and my relationships with them ground me.

❖ **Interests**
  ➢ I enjoy reading. One of my favorite novels is *Jane Eyre* by Charlotte Bronte.
  ➢ During my down time, I listen to true crime and sociological based podcasts.
  ➢ A particular guilty pleasure of mine is watching Netflix. *Bojack Horseman, The Haunting of Hill House, Mindhunter, and Stranger Things* are some of my frequented binges.

❖ **Career**
  ➢ Seeing as I am a computer science major and my concentration is digital forensics, I hope to pursue a career as a digital forensics analyst in either a governmental agency or a private sector corporation.

❖ **What I Hope to Learn**
  ➢ I hope that Object Oriented Programming provides me with the tools to simplify my approach to programming, and allows me to increase my organizational skills. Moreover, I wish to become proficient in Java and expand my knowledge accumulated from last semester.
